*\*\*Registration Fee includes STAR Nova T-shirt*

*\*\*\*Register for 3 or more sessions and waive the registration fee*

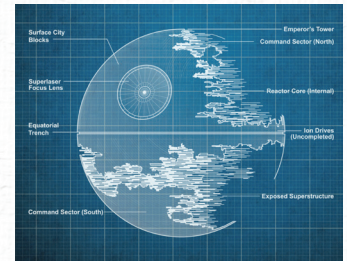

### Grossology

STAR Nova invites you to take a look into the beautiful, yet grotesque things that the Earth has to offer. From the awesomely awful to the surprisingly scuzzy, Grossology will take you on an adventure through hands-on scientific exploration. Come and discover the science behind some of your favorite delightfully disgusting and pleasantly putrid projects. CAUTION! - By attending Grossology you will experience a never-ending curiosity about the nasty, grody, and hideous discoveries of the Earth, and you may get a little messy in the process!

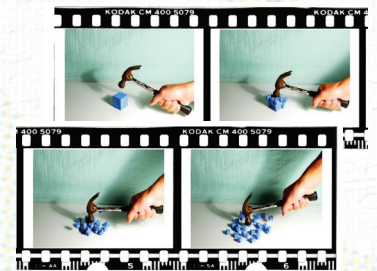

### The Science Of Star Wars

Welcome, Young Padawan! Are you interested in learning about how spaceships launch and learning how lightsabers were created in Star Wars? If so, you are invited to attend the Science of Star Wars! In this class, you will discover the science behind one of the greatest movie franchises of all time! Along with the above mentioned activities, you will be participating in a Sarlaac Pit rescue challenge and discovering how the special effects in the movies were developed. You will even learn more about The Force through a static electricity experiment! Come join now and may The Force be with you!

### Stop Motion Animation

Do you like to create and tell stories? Do you like using new technology? In this class, you will create your own stories through the technology of Stop Motion Animation. You will get to brainstorm story ideas, create a backdrop, and use a state-of-the-art app to bring your stories to life through the wonder of Stop Motion Animation. At the end of this class, you will showcase your movies in a small Film Festival held in your classroom. Don't forget to sign up now!

### Food Science

Do you love food? What about science? Well, lucky for you in Food Science, we will be exploring the amazing wonders of food through the studies of science! Not only will we get to enjoy our awesome edible experiments, but we will also identify how science plays a chemistry part in our foods production. Strap on your science goggles and your cooking aprons as we begin to view food a whole lot differently! Join us in a Food Science adventure!

**Registration begins Monday, July 16<sup>th</sup> • 9 AM @ [nova.starsacramento.org](http://nova.starsacramento.org)**
